

# Survey Smart: LTC Deficiency Trends & Solutions

This series offers long-term care professionals an in-depth understanding of the most frequently cited deficiencies in nursing homes with practical solutions to avoid similar citations. Each session focuses on a specific regulatory requirement, such as infection prevention, accident hazards, comprehensive care planning, and pharmacy services. Participants will learn about the latest regulatory updates, common pitfalls, and effective strategies to maintain compliance and improve quality of care. Through case studies and practical insights, this series equips nursing home leaders, compliance staff, and administrators with the tools they need to navigate complex regulations and ensure the highest standards of resident care.
